

Veracross

Powerful software, extensive customizations, and world-class service are the building blocks of *The Veracross Difference* and the keys to our success.

Only the Veracross software platform has our unique database architecture coupled with a state-of-the-art technology framework that enables us to both easily enhance your Veracross solution and tailor that solution to the specific needs of your school.

Our unique service model sets us apart; in fact we consider ourselves as much a services company as a product company. This service is delivered by your dedicated Account Manager who becomes knowledgeable about your school and its requirements and works to ensure that Veracross continues to meet your ongoing needs.

Each *Veracross Total Solution* is composed of software, services, and customizations. Since no two schools are the same, each total solution is unique and contains the right combination of software, services, and customizations to ensure that it is tailored to the particular needs of the school.

Veracross technology is based on the unique architecture we have developed and refined over the years. As with all state-of-the-art systems, we are continuously adding new functions and features to our standard software, based on input from our customers, our understanding of schools, and new advances in technology.

CareFlow Electronic Student Health Records

User Friendly, Secure, and Mobile:

CareFlow is designed to make charting and collecting information quick and easy. Our web-based program allows you to access secure information wherever you go.

- Collect and update enrollment information from parents throughout the year using our EasyEnroll module.
- Get assistance with any remaining scanning and data entry efforts with our cost-effective ScanSense service.
- Use CareFlow eResponse to provide emergency access to Chaperons, coaches, and other responsibility parties without spending time or money printing reports.
- Integrate with any student information system to collect and maintain up to date student data.
- Track student attendance in your health center and share the data with faculty and export to other IT systems.
- Keep a full visit history or just add Quick Notes for student interactions at the health center.
- Allow Athletic Trainers to track and treat injuries and examine trends.
- Enable secure communication with school counselors through our counselor notes and attendance feature.
- Receive and/or send immunization and physical reminders and alerts based on state requirements.
- Save money on paper, ink, and the long hours dedicated to your health center's needs.
